## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Duran (6,688,780).

Regarding claims 1 and 9, Duran, figures 2b and 3b, discloses a fiber optic adaptor (220) comprising:

- a central housing (261) formed of metal (column 5, lines 45-49). The central housing including a first and second latch portions having first and second latch portion side walls, respectively, an internal wall (228) positioned between the first and second latch portions, a first and a second latch cavities, and an aperture (229) provided through the internal wall;
- a first latch (262) for mating with the first latch cavity which having a first fiber passageway and each side wall including a cantilevered latch arm (264) which mate with the first latch portion; and
- a second latch (262') including a second fiber passageway, each side wall including a cantilevered latch arm (264').

Regarding claims 2 and 13, apertures (23) provided through each the side wall of the first and second latch portions, a tooth (266) and another tooth (266') extending outwardly from each the side wall of the first and second latch for engagement with the apertures.

Regarding claims 3 and 14, the first and second latch portions each including two V-shaped rails.

Regarding claims 4 and 15, the first and second latch portions each including a U-shaped guiding structure.

Regarding claims 5 and 16, each latch arm including an offset finger latch.

Regarding claims 6 and 10, a flange (266) extending outwardly from the central housing.

Regarding claims 7 and 17, the aperture through the internal wall is generally rectangular shaped.

Regarding claims 8 and 11, the internal wall is aligned and angled relative with the flange.

Regarding claim 12, the first and second fiber passageways are angled relative to the flange.
